RaceDay - API Endpoint Plan

This is the full list of endpoints I am planning to build for Part 2. I wrote this before any API code, like the brief asks. Roles are either Organiser or Participant. Endpoints marked None are public and don't need a logged in user.

Authentication

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
POST	/api/auth/register	Creates a new user account as either an Organiser or a Participant. Hashes the password before saving it.	None (public)	{ fullName, email, password, idNumber, role }	201 Created - user created, returns userId. 400 Bad Request - missing fields or invalid role. 409 Conflict - email already registered
POST	/api/auth/login	Checks the email and password against the users table and returns a JWT token so the user can call protected endpoints.	None (public)	{ email, password }	200 OK - returns JWT token and role. 401 Unauthorized - wrong email or password

User Profile

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
GET	/api/users/{id}	Gets the profile info for one user (fullname, email, role). Used so a user can view their own profile.	Any (logged in)	None	200 OK - user profile data. 404 Not Found - user doesn't exist
PUT	/api/users/{id}	Updates the profile info for the logged in user, like fullname or email.	Any (logged in)	{ fullName, email }	200 OK - profile updated. 400 Bad Request - invalid data. 404 Not Found - user doesn't exist

Events

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
GET	/api/events	Lists every event so participants can browse what's coming up.	None (public)	None	200 OK - array of events
GET	/api/events/{id}	Gets the full details for one event, including its categories.	None (public)	None	200 OK - event details. 404 Not Found - event doesn't exist
POST	/api/events	Creates a new event. Only the organiser who is logged in can create one, and they become the owner of that event.	Organiser	{ eventName, eventDescription, eventDate, location }	201 Created - event created, returns eventId. 400 Bad Request - missing fields
PUT	/api/events/{id}	Edits an existing event. Only the organiser that owns the event can edit it.	Organiser	{ eventName, eventDescription, eventDate, location }	200 OK - event updated. 403 Forbidden - not the owner. 404 Not Found - event doesn't exist
DELETE	/api/events/{id}	Deletes an event. Only the organiser that owns the event can delete it.	Organiser	None	200 OK - event deleted. 403 Forbidden - not the owner. 404 Not Found - event doesn't exist

Categories

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
GET	/api/events/{eventId}/categories	Lists all the categories (like 5km, 10km, 21km) that	None (public)	None	200 OK - array of categories . 404 Not Found -

		belong to one event.			event doesn't exist
POST	/api/events/{eventId}/categories	Adds a new category to an event. Only the organiser that owns the event can add one.	Organiser	{ categoryName, distance, price, maxParticipants }	201 Created - category created, returns categoryId . 404 Not Found - event doesn't exist
PUT	/api/categories/{id}	Edits a category, like changing the price or the max participants .	Organiser	{ categoryName, distance, price, maxParticipants }	200 OK - category updated. 403 Forbidden - not the owner. 404 Not Found - category doesn't exist
DELETE	/api/categories/{id}	Removes a category from an event.	Organiser	None	200 OK - category deleted. 403 Forbidden - not the owner. 404 Not Found - category doesn't exist

Event Enrolments

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
POST	/api/categories/{categoryId}/enrolments	Enrols the logged in	Participant	{ } (participant)	201 Created -

		participant into a category for an event. Sets the status to Pending.		nt comes from the JWT token)	enrolment record with status. 404 Not Found - category doesn't exist. 409 Conflict - already enrolled in this category
GET	/api/enrolments/my	Gets every enrolment that belongs to the logged in participant, so they can see events they've entered.	Participant	None	200 OK - array of the participant's enrolments
GET	/api/events/{eventId}/enrolments	Gets every enrolment for one event so the organiser can see who has entered.	Organiser	None	200 OK - array of enrolments for that event. 403 Forbidden - not the owner. 404 Not Found - event doesn't exist
DELETE	/api/enrolments/{id}	Cancels an enrolment. A participant can cancel their own	Participant	None	200 OK - enrolment cancelled. 403 Forbidden - not the owner of the

		enrolment .			enrolment. 404 Not Found - enrolment doesn't exist
--	--	----------------	--	--	--

Results

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
POST	/api/enrolments/{enrolmentId}/results	Captures the finish time and position for one enrolment after the race. Only the organiser of that event can capture it.	Organiser	{ finishTime, position }	201 Created - result saved. 403 Forbidden - not the owner. 404 Not Found - enrolment doesn't exist. 409 Conflict - result already captured for this enrolment
GET	/api/results/my	Gets all the results that belong to the logged in participant, so they can track their personal performance history.	Participant	None	200 OK - array of the participant's results
GET	/api/events/{eventId}/results	Gets all the results for an event, for the organiser to review	None (public)	None	200 OK - array of results for that event. 404 Not Found -

		or for a public results list.			event doesn't exist
